Inter Cars SA, as official Autodata Distributor, introduce

AUTODATA ON-LINE

Established in 1975 Autodata company, is a world leading provider of technical information to the automotive aftermarket. Technical data is licensed directly from over 80 vehicle manufacturers, covering 29,000 models worldwide.

All the information Autodata provides is researched by their own industry trained professionals who understand vehicles and the way technical information is used in a modern workshop. This collaborative process enables to produce information that is relevant, up-to-date, comprehensive and of the highest quality. The result is a user-friendly and interactive system covering all of the latest technologies.

Essential features

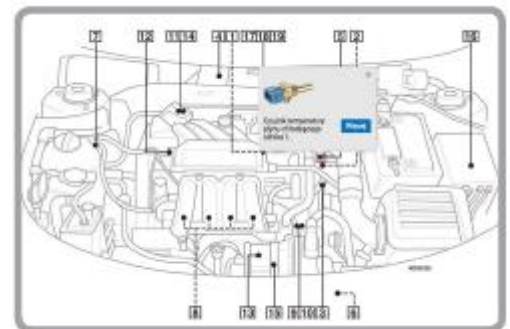

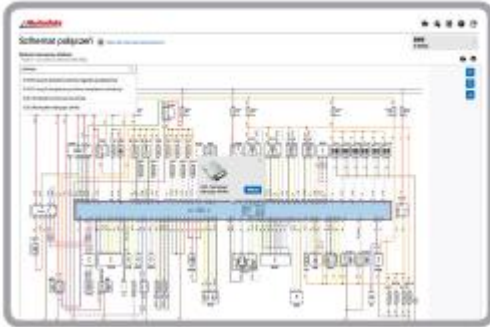

Comprehensive Technical Data

With technical information for 80 manufacturers covering 29,000 models, Autodata gives you all of the detailed information you need to carry out services, maintenance and repairs. The intuitive navigation and simple design places all the information you need right at your fingertips.

Component Locations

Interactive component location pages allow you to search for components, see images and access more information, quickly and without fuss. This approach saves valuable workshop time and provides easy access to the exact information you need, when you need it.

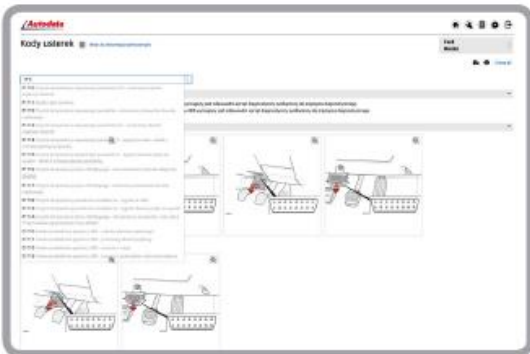

Interactive Wiring Diagrams

Wiring diagrams allow you to zoom in and out, search for components, select relevant sections and click through for further details and related data. Each one of our 12,700 wiring diagrams is presented in the same easy to use format, to the same high standard, so that no interpretation is required from manufacturer to manufacturer.

Access from Multiple Devices

Autodata is an online tool available on PC, Mac and tablet to accommodate the different requirements of modern workshops. This feature is available as standard on both the Diagnostic & Repair and Service & Maintenance subscription and requires no downloads or installs.

Quick Search for Diagnostic Trouble Codes

Simply search using diagnostic trouble codes or component names to instantly find information, solutions and links to relevant components, making your life easier and saving time.

Subscription

Diagnostic&Repair is most popular Autodata subscription which contains in-depth and detailed information you need to carry out complex diagnostics and repair procedures, as well as day-to-day servicing and maintenance procedures.
